

BOUZIR MOAHAMED ALI

Data-Oriented Computer Engineer

Career Objective

Computer Engineer specializing in Artificial Intelligence, Data Science, and Back-End Development, with a strong focus on building scalable, data-driven solutions. Proficient in transforming complex datasets into actionable insights, automating workflows, and deploying intelligent systems that enhance decision-making and operational efficiency.

Phone: +216 56 815 716

Email: bouzirdali@gmail.com

Address: Monastir, 5000 – Tunisia

Date of Birth: February 18, 2001

Portfolio: <https://dali-eight.vercel.app>

Education

École Supérieure Privée d'Ingénierie de Monastir

Engineering Program in Computer Science – Final Year (Specialization: Artificial Intelligence & Data Science)

2023 – Present

Faculty of Sciences of Monastir

Bachelor's Degree in Software Engineering and Computer Science (LGLSI)

2020 – 2023

Fattouma Bourguiba High School, Monastir

Baccalaureate – Technical Section (Honors: Good)

2019 – 2020

Languages

- **Arabic:** Native
- **French:** Fluent (B2 – TCF Campus France)
- **English:** Fluent

Technical Skills

Programming Languages: Python, Java, C/C++, SQL, JavaScript, PHP, R

Web Development: React, Next.js, Laravel, Flask, Django, HTML, CSS, Bootstrap, REST APIs, Firebase, Supabase, Docker

Data Science & AI: Pandas, NumPy, Scikit-learn, TensorFlow, Keras, PyTorch, NLTK, SpaCy, Transformers, VAE, Diffusion Models, CRISP-DM

Data Engineering & MLOps: FastAPI, MLflow, Elasticsearch, Kibana, PostgreSQL (pgVector), OpenSearch, Docker

Tools & Environments: Git, GitHub, VS Code, Postman, Airtable, Trello, Tableau, Excel, Oracle DB, Arduino IDE, Google Workspace

General Skills

Self-motivated, detail-oriented, and organized professional with a strong team spirit. Demonstrates excellent abilities in analytical thinking, problem-solving, adaptability, technical communication, time management, and collaboration within dynamic, fast-paced, and innovative environments.

Certificates

- **Python for Data Science, AI & Development** - IBM (Dec 3, 2023)
- **Fundamentals of Visualization with Tableau** - University of California (Dec 23, 2023)
- **What is Data Science?** - IBM (Dec 27, 2023)

Interests

Music (piano), digital media editing and production, technology exploration, and web research.
Enthusiastic about sports, especially football, with a strong competitive and team-oriented mindset.

Development Projects

Meriem Booking

Web-Based Booking Platform for Therapists

- Engineered a responsive booking platform using Next.js 14 and Supabase to streamline therapist appointment scheduling.
- Enabled users to check availability, manage session exceptions, and schedule bookings via an intuitive interactive calendar.
- Integrated real-time slot management with Supabase and refine booking flow for seamless user experience.
- Built a lightweight admin dashboard for therapists to oversee bookings and manage schedules efficiently.

Technologies: React (Next.js 14), Supabase, motion-dom, Tailwind CSS

Link: <https://fittrahmoms.com>

AFFA – Automated Fantasy Football Assistant

- Developed an AI-powered assistant using sports analytics, MLOps pipelines, and predictive modeling (Random Forest, Bayesian models) to recommend top-performing players weekly.
- Processed 15+ gameweeks of player data and delivered personalized predictions with ± 2 point accuracy.
- Integrated MLflow for experiment tracking and optimized model performance, reducing prediction error by 73%.
- Deployed real-time monitoring dashboards with ElasticSearch and Kibana for performance tracking and insights.

Technologies: Python, Flask, FastAPI, NLTK, MongoDB, API-Football, Docker, MLflow, ElasticSearch, Kibana

Link: <https://bouzirdaliaa.pythonanywhere.com>

QuirkHire — AI Résumé Recommendation Platform (Final-Year Project)

- Engineered an intelligent career-matching platform that assists career centers in optimizing candidate–job alignment using NLP and LLM-based recommendation models.
- Architected a hybrid NLP/LLM engine capable of performing semantic résumé analysis and generating personalized, explainable recommendations for recruiters.
- Deployed an analytical dashboard enabling recruiters to evaluate match accuracy, monitor candidate performance, and track engagement metrics.
- Designed an intuitive front-end interface to enhance candidate experience and streamline the application workflow.

Technologies: React, Django, Django REST Framework, Supabase, Redux Toolkit, OpenRouter API

Link: <https://career-reco.vercel.app>

AI Business Agent — Intelligent Decision-Support SaaS Platform

- Delivered a production-ready SaaS platform that drives data-informed decisions through LLM reasoning, retrieval-augmented search, and Monte Carlo risk modeling.
- Designed a hybrid query engine that classifies user intents and routes requests to LLM, RAG, or simulation workflows, producing defensible insights and visualizations.
- Built a retrieval-augmented generation stack on PostgreSQL (pgVector) and OpenSearch, coupling it with Monte Carlo simulations running 10,000+ iterations per scenario.
- Engineered ingestion for PDF, spreadsheet, and image sources with real-time vectorization, Grafana-based observability, and robust data governance controls.
- Scaled the system to process 35,000+ queries, execute 120+ risk simulations, and sustain 92% response accuracy with a 2.7 s median latency.

Technologies: Next.js 14, FastAPI, PostgreSQL + pgVector, OpenSearch, MinIO, Redis, Ollama 3B, Docker Compose, Grafana.

Professional Experience

ElyosDigital Company — Web Development Intern

Monastir, Tunisia | June 18, 2024 – July 18, 2024

- Designed and launched a full-stack gym management platform in Laravel to digitalize memberships, subscriptions, and coach scheduling — boosting administrative efficiency by ~30%..
- Introduced automated session scheduling workflows that reduced manual coordination and enhanced operational consistency.
- Streamlined coach assignment and session planning, improving schedule accuracy and reducing conflicts.
- Delivered responsive, secure back-office modules emphasizing data protection and user experience.

MyMatch — Back-End & Admin Panel (Freelance Project)

Remote – Monastir, Tunisia | September 2024 – May 2025

- Designed a full-featured administration dashboard to manage 7,000+ players and 70+ sports complexes, enabling centralized monitoring and operational control.
- Built scalable backend services using Laravel and integrated Firebase and REST APIs to facilitate real-time data synchronization and authentication.
- Implemented interactive dashboards for administrators with real-time performance tracking and dynamic visual analytics.
- Optimized data flow and integrated secure authentication, enhancing responsiveness and improving administrative efficiency.
